## WPC DECK

Decorate your Balcony, Porch, Garden, Patio Or Courtyard with an innovative eco-friendly WPC decking.

WPC Decking is fast growing in popularity and thanks to our research and design team this floor is processed using high-grade raw material and cutting edge technology.

WPCs do not corrode and are highly resistant to rot, decay, and marine borer attack, though they do absorb water into the wood fibers embedded within the material.

# Composite Decking Collection

146mm X 24mmX 2400mm
